CLAIM AMENDMENTS:

Please amend claims 6 and 7 to correct typographical errors. A complete listing of the currently pending claims reads as follows:

1. (Original) A system for testing electronic modules comprising:
at least one mapping board box including at least one harness port;
at least one harness operably connected at one end to the at least one harness port,

the mapping board box including a plurality of pin receptors in electronic communication with the at least one harness port, the pin receptors adapted to communicate with a circuit printed on a circuit board with pins, wherein the mapping board box is pre-wired to receive circuit boards with a variety of pin configurations.
2. (Original) The system of claim 1 wherein the dimensions of the at least one mapping board box are sized to fit a printed circuit board.
3. (Original) The system of claim 1 wherein the at least one harness port comprises 56 pins.
4. (Original) The system of claim 1 wherein the at least one mapping board box comprises 560 pin receptors.
5. (Original) The system of claim 1 wherein the at least one harness comprises a generic harness.

6. (Currently Amended) The system of claim 5 [[where in]] wherein the generic harness comprises 56 wires.

7. (Currently Amended) The system of claim 1 further comprising an electronic ~~simulators~~ simulator.

8. (Original) A method of testing an electronic module, the method comprising pinning a circuit board corresponding to an electronic module; and inserting the pinned circuit board into a pre-wired mapping board box.

9. (Original) The method of claim 8, the method further comprising receiving the pinned portion of the board into connection ports in a mapping board box.

10. (Original) The method of claim 9, the method further comprising communicating between a circuit and the module via the mapping board box and a harness connection.

11. (Original) A system for testing an electronic module comprising:
means for receiving a circuit board;
means for communicating between the circuit board receiving means and an electronic module.
